## How are roommates assigned?

There are two ways that roommates are determined:

### 1. Find a friend through the roommate selection process between June 24-July 14

- Must be assigned to double, community bath to participate
- Applications completed in Phase 1 & 2 are eligible to participate
- Applications completed April 14-May 8 who are given a building assignment can participate if their hall window is still available
- Each hall has its own roommate selection time frame; specific hall dates will be communicated once building assignments have been sent
- Log in to your housing application during your assigned hall's window to see suggestions that are made based on your answers to the lifestyle questions
- Message other students in your hall and/or program
- You will be placed together ONLY if the request is mutual, meaning one student requests it and the other confirms it

### 2. Leave it to us!

- We assign all students who did not find a roommate in the selection process or who did not participate
- We ask lifestyle questions on the application to find out your sleeping habits, study habits, preferred room noise, etc.
- We then assign you with someone who is a good match based on your answers

## How do I change my assignment?
